

Module 6 : CHAR Function

6.1 Char Formula

The CHAR function (CHAR is for character), returns the character specified by a number.

It automatically translates code page numbers into characters.

The CHAR function is as follows: =CHAR (number).

The number refers to the character set used by your computer, and is up to number 255. For example, =CHAR(65) results in A on almost all computers.

6.2 Video Instruction

Char Function- 1m 59s

6.3 Task

Estimated Time: 10 minutes

Download the worksheet that accompanies this video by clicking below. Once downloaded practice using the Char Function in Excel using the video above as a reference.
