Module 26: Change Text To Upper Case

26.1 Change Text To Upper Case

To change the capitalisation of certain text, you can use a formula instead of wasting time deleting and retyping everything.

To do this, first you have to create a column or row for the return value or information.

Then, input the formula as follows: =UPPER(reference value)

This will change all of the text to upper case.

26.2 Video Instruction

Change Text To Upper Case – 1m 08s

26.3 Task

Estimated Time: 10 minutes

Download the worksheet that accompanies this video by clicking below. Once downloaded practise with Changing Text To Upper Case using the video above as a reference.
