

Module 22: Count Formula

22.1 Count Formula

The count function simply counts the number of cells that contain numbers within the list of arguments.

The formula is: **=COUNT(range)**

For this function, it doesn't matter what sort of data is contained in the cell; arguments include numbers, dates, and others.

22.2 Video Instruction

Count Formula in Excel - 2m05s

22.3 Task

Estimated Time: 10 minutes

Download the worksheet that accompanies this video by clicking below. Once downloaded practice working with the Count Formula in Excel using the video above as a reference.
