

Module 28: Pie Charts

28.1 Pie Charts

The Pie Chart Function allows you to present numerical data you have in a visual manner.

However, it is important to note that not all data is appropriate to present in a pie chart.

It is appropriate when:

- You only have one data series
- None of the values are negative
- You have only a few categories
- The categories, together, represent a total

To create a Pie Chart:

Select the data you want to plot, together with headers. Your pie should appear on the worksheet.

On the Insert tab, in the group called Charts, click pie.

Click the plot area and options will appear on the header so you can edit design, layout and format.

28.2 Video Instruction

Pie Charts in Excel - 2m 59s

28.3 Task

Estimated Time: 10 minutes

Download the worksheet that accompanies this video by clicking below. Once downloaded practice Pie Charts in Excel using the video above as a reference.
