

Module 15: How to Make a Balloon Rabbit

- How to make a balloon rabbit - picture tutorial
- How to make a balloon rabbit - video tutorial

By the end of this chapter, you will know:

- How to make a Rabbit balloon model

15.1: Step-by-step Guide

Step 1

Pump the balloon leaving approximately 3 or 4 inches deflated

Step 2

We'll start with the rabbits nose - take an inch, pinch then twist and hold in place

Step 3

About a fingers length further down the balloon make another twist. This will make one of the rabbit's ears.

Step 4

Bend the long length of remaining balloon back so it runs parallel with the twists you have created in steps 2 and 3.

Step 5

At the twist; pinch the two sections of balloon together.

Step 6

Twist your hands in opposite directions to form a lock twist.

Step 7

Next we'll make a neck. Simply pinch and twist the balloon about an inch or so further down from the ears making sure you hold this twist in place.

Step 8

Then about another 3-4 inches down the balloon do the same again to create a leg. Make sure you are still holding the last two twists in place.

Step 9

Bring the long balloon down beside the twists created in the last two steps and grip both parts of the balloon together

Step 10

At the twist, pinch the two balloons together and twist in opposite directions forming a lock twist.

Step 11

Another fingers length down the balloon pinch twist and hold to create the rabbit's back.

Step 12

About half way down the remainder of the balloon pinch, twist hold down.

Step 13

Now we will make the back legs. Double the balloon back on itself. Leaving about an inch of balloon over perform a lock twist.

Finished Model

Tuck the front legs through the back legs and your model is complete.

15.2: Video Tutorial

How to make a rabbit - 02:08

Go and Practice

estimated time: 20 minutes

Using the instructional videos above as a reference practice making balloon rabbits. Spend at least 20 minutes on this activity or until it feels more natural and you don't have to think too hard to do it.

Once completed you are ready to start the next module
